

Patricia's March Message

Happy St. Patrick's Day!! I trust this finds you all making the most of the nice weather and exercising patience on the colder days!! When we thought the snows of February would never stop, we swing into the month of March, a month of beginnings. We anxiously look for some easement of weather as the shift from winter to spring begins to move. March is a month of renewal, of transition, and most notably, hope. March brings us some days of celebration, whether you are Irish or not, and a chance to be silly. Daylight Savings has made an appearance, giving us added light as well as religious observances and days of awareness... March is full of surprises, a welcome reprieve and hope for spring. While we watch for the play out of the weather adage, "in like a lion, out like a lamb" we enjoy the changes March brings and the light of spring. Regardless of how you celebrate March, that happy and optimistic move from winter makes every day a day to enjoy. This is also available on our website at www.nsgrea.ca
